## Central Color from Prepress to Production

Colorspace empowers both the PACKZ prepress editor and CLOUDFLOW production workflow so that color management is centralized, automated, and accurate.

## Why choose Colorspace?

### Accurate color predictions

Colorspace intelligently estimates color performance based on your selection of printing presses and substrates.

### Impeccable brand color matching

Achieve precise color reproduction with visual and numerical ( $\Delta E$  and separation count) reporting.

### Optimize production costs

Reduce ink usage through Extended Color Gamut (ECG) printing and ink-saving technology while maintaining high-quality output.

### Adaptable workflows

Enjoy output routing flexibility with CLOUDFLOW Colorspace's late binding approach for digital, conventional and hybrid print conditions.

### Powered by ColorLogic spectral technology

Colorspace is a unique product which combines the powerful color management products of ColorLogic with the automation to deliver consistent, precise color reproduction across diverse substrates and printing technologies.

### Integrated Colorspace in PACKZ PDF editor

Achieve color-accurate previews and precise color transformations using ICC Device and DeviceLink profiles for CMYK consistency across print processes, with advanced support for multicolor and expanded gamut conversions.

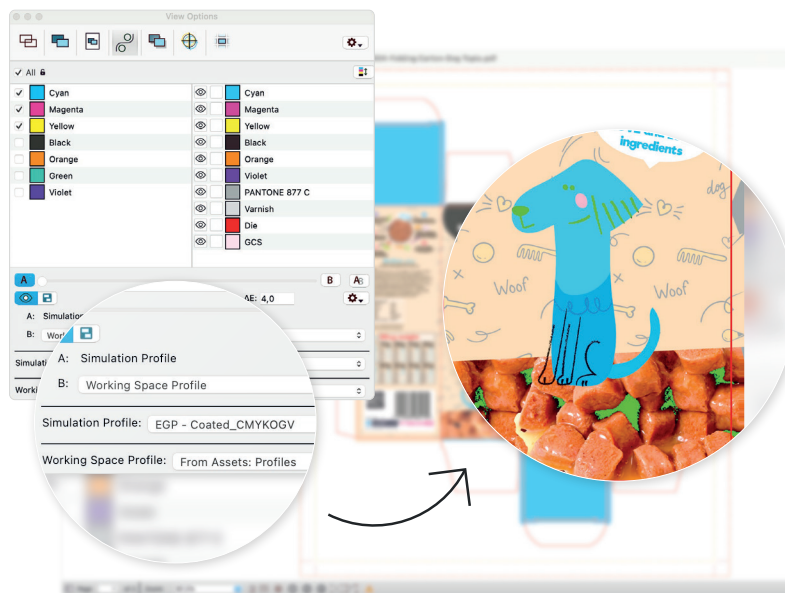

## Colorspace in CLOUDFLOW

Centralize color in production workflow with the modular workflow automation suite for labels and packaging.

- ✓ Facts-based estimation empowering print buyers, estimators, and prepress professionals
- ✓ Late-binding approach increases output flexibility in production
- ✓ Synchronized color resources are accessible in the cloud and on-premises
- ✓ Integrate color information into file review, collaboration and feedback workflow

about CLOUDFLOW!

## Colorspace in PACKZ

Integrate color management in prepress with the all-in-one PDF editor for labels and packaging.

- ✓ Preview color results in prepress for CMYK and ECG print conditions in a color-accurate environment
- ✓ Using open ISO standard ICC profiles, ColorLogic SmartLinks and spot color matching
- ✓ Synchronized color resources are accessible in the cloud and on-premises
- ✓ Full support for PANTONE® Digital Color
- ✓ Also including full support for ISO standard CxF/X-4 and CxF/X-1, and custom color books
